SUMMARY REPORT

Report to: Open Board of Directors
Date: 8th March 2017
Subject: Board Risk Profile
From: Margaret Saunders, Director of Corporate Governance (Board Secretary)
Prepared by: Margaret Saunders Director of Corporate Governance (Board Secretary)

1. Purpose

The attached report is the Board Risk Profile produced using the high level risks currently recorded on the Trust’s Corporate Risk Register. This report is provided to enable greater awareness and understanding at Board level of the major risks facing the organisation and for the Board to challenge the effectiveness of the controls in place to mitigate these risks.

2. Summary

The corporate risk register records the risks that underlie the strategic, overarching risks that are captured on the Board Assurance Framework (BAF); the operational risks that the Trust faces on a day-to-day basis. Risks that cannot be controlled within a single directorate, or that affect more than one directorate, are recorded on the corporate risk register.

The risks on the Risk Profile have been graded using the Trusts 5 x 5 risk matrix shown below. Only those risks rated 12 or above are shown on the Board Risk Profile of which there are currently six.

Consequence	Likelihood				
	Rare (1)	Unlikely (2)	Possible (3)	Likely (4)	Almost Certain (5)
Negligible (1)	1	2	3	4	5
Minor (2)	2	4	6	8	10
Moderate (3)	3	6	9	12	15
Major (4)	4	8	12	16	20
Catastrophic (5)	5	10	15	20	25

Once completed, actions are no longer shown on the report. Therefore all actions are either outstanding or on-going.

Since this report was last presented to the Board of Directors in February 2017 the following amendments have been made:

(i) Risk Numbers:

3327 – Clinical Audit has been re-assed and with strengthened controls with good progress being the risk has been de-escalated to Directorate level.
